Dương Trần

has successfully completed the online Specialization

AI Engineer Professional

Congratulations on completing the AI Engineer Professional specialization! Through this program, you have gained hands-on experience with advanced AI engineering techniques, including hyperparameter tuning, deep learning model design, and MLOps. You have built deep learning models for computer vision, text analysis, and natural language processing, and you are now equipped with the skills to deploy machine learning models in real-world environments. By successfully completing the specialization, you are prepared to take on complex AI projects and contribute to AI engineering teams.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
