Dương Trần

has successfully completed the online Specialization

Modern Natural Language Processing

Congratulations on completing the "Modern Natural Language Processing" specialization! This certificate acknowledges your successful mastery of the core concepts and skills necessary for implementing deep learning and probability models in Natural Language Processing. You have acquired the knowledge to apply cutting-edge techniques such as TensorFlow for text classification, probability models for text prediction, and Hugging Face Transformers for real-world NLP applications. You can confidently tackle NLP tasks like named entity recognition, sentiment analysis, and text generation. This specialization has equipped you with both theoretical insights and practical coding experience, empowering you to solve advanced NLP challenges with modern tools.
